
100-foot folding container for fire stations

What is a fire training container?

These fire training structures offer an investment in firefighter safety by providing fire scenarios and challenges while allowing firefighters to train in safe, near real-life conditions. These containers offer a versatile environment, from realistic fire training props to unique or specialized environments such as multi-floor fire training.

Why did the fire department use a shipping container complex?

The fire department wanted to use a shipping container complex, as these facilities allow firefighters to better train in real-life scenarios with the necessary safety guards in place.

Are shipping containers good for firefighter training?

Shipping containers for firefighter training offer a solution by equipping fire departments with affordable, durable training facilities. They help firefighters develop critical firefighter skills like search and rescue, hose handling, and flashover awareness.

Why should you build a fire training building with shipping containers?

Building with shipping containers also means the design can easily grow over time. Solution: Our team put together a facility consisting of three shipping containers fused together. Internally the structure simulates an average home with walls, doors and windows. Check out our floor plan below for specifications on this fire training building.
