
1500w solar inverter for sale in Melbourne

What is a 1500 sine wave inverter?

A 1500 pure sine wave inverter is used to change current AC to DC, which can deliver high-quality electrical current (like utility standards voltage: 230V, recurrence: 50/60hz) to a wide range of home machines.

How much power does a sine wave inverter provide?

Read 17 Reviews. Same page link. This pure sine wave inverter is capable of providing 1,500W continuously and a 3,000W surge. Ideal for powering microwaves, power tools, TVs, and other power thirsty devices when you are away from mains power. It features a standard 240VAC mains outlet as well as a USB port (2.1A) to charge USB devices.

What is a pure sine wave inverter?

A pure sine wave inverter is a device that can convert DC power into AC power. We are providing these inverters to operate on 220/230 volts and deliver up to 3000 watts. The output frequency of this type of inverter is 50 Hertz, just like the standard household current in most countries worldwide.

How does a 1500 watt inverter work?

With different insurance circuits worked in, the 1500 watt inverter will consequently close down at low voltage or in case of an abrupt difference in input/yield power. The inverter likewise shows impressive execution and unwavering quality control during fast ecological changes like surrounding temperature.

A versatile and high spec inverter with MPPT solar charger in built. This unit is ideal for off-grid solar panel systems, providing 240V pure AC mains power for your appliances, whilst charging ...

Some characteristics and features of the Latronics range of inverters include: Standby Mode - A valuable power saving feature which automatically turns your inverter ON and OFF with load. ...

A truly versatile inverter range that is perfect for off-grid solar power system in caravans, yachts, holiday houses and any standard application where inverters are used. The built in solar ...
