## 2kva standard uninterruptible power supply

What is a 2kva ups?

2kVA UPS (Uninterruptible Power Supplies) are used for smaller power protection applications, like backup up a few computers or EPOS. This means that they can be used by homeowners, in offices or in stores. We source UPS from a wide range of UPS systems manufacturers. You can find more information here: [Riello UPS](#) [Eaton UPS](#) [APC UPS](#)

What is a 3kva uninterruptible power supply?

3kVA uninterruptible power supplies are designed to power loads up to 3kVA but the kilo-Watt loading will depend on the UPS output power factor. Typical loads for a 3kVA UPS include file servers, storage devices IT networks and VoIP telecoms systems.

What 2kva ups are available from server room environments?

2kVA UPS systems available from Server Room Environments include line interactive and on-line uninterruptible power supply systems. 2kVA UPS will be rated at 2000VA and have different output Watts rating dependent upon the power factor used by the UPS manufacturer. Please check the individual products for their kW rating.

Does a 2kva ups have an internal battery?

A 2kVA UPS will have an internal battery. Some of these UPS have an external battery pack connector for longer runtimes. The amount of battery runtime available is dependent upon the load placed onto the UPS and the age, battery charge % and ambient environment.
