## 4w12v solar water pump

The 4-inch solar water pump kit is a complete kit that uses solar energy to pump water from a well or other water source. It is ideal for deep well irrigation, livestock irrigation, ...

The model of submersible solar water pump is: 4SPW12-2P-A, the power is 1200w, the max head is 23m, the max flow is 18.8m<sup>3</sup>/h, DC voltages range is 60-450V, AC voltages range is 90-240V.

Solar water pump is typically used in domestic water supply, irrigation projects and for pumping water. A solar water pump uses the energy of the sun. The electricity is provided ...

The Yangchun Solar Screw Water Pump is an innovative irrigation solution, specifically engineered for the agricultural industry. With a robust DC brush motor and customizable ...

Discover our range of solar water pumps, designed to harness the power of the sun for efficient water pumping solutions. Experience eco-friendly and cost-effective water pumping with our ...

The 4HVSCW Wide Voltage Solar Submersible Pump features a 4-inch diameter design and a wide-voltage brushless DC water-filled motor, providing stable and energy-efficient operation ...
