# Ac110v solar container uninterruptible power supply

What is an uninterruptible power supply (UPS) system?

The use of an Uninterruptible Power Supply (UPS) system specially designed for solar PV plants can improve the power generation and reduce the downtime of a solar PV plant.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

How to choose a power supply for a DC application?

Select the appropriate power supply, uninterruptible power supply, and battery module for your application. Furthermore, our UPS modules with integrated power supply or integrated battery module offer a space-saving UPS solution. Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions.

How to choose an AC UPS system?

Select the ideal AC UPS and ensure superior system availability. Configure your UPS system with the maintenance-free buffer modules. Protect your application and also bridge short failure times lasting up to 30 seconds. The buffer module stores the energy required to bridge mains failures in maintenance-free capacitors.
