
Antananarivo solar module export tax rate

How to import photovoltaic panels?

If you want to import photovoltaic panels, you should have at least basic parameters of the goods specified. Based on your requirements, the supplier will be able to suggest you the most suitable product. The country that ranked first in the production of photovoltaic panels in the world is China.

What is a solar tariff?

A solar tariff is an additional fee or tax that a country charges on various types of solar power equipment imported into its borders by manufacturers that are based in another country. Often this is added to solar modules (panels), module components, and the raw materials needed to make modules, but it can include other components as well.

Could solar panels go out of business without a tariff?

Although most of the solar energy industry opposed the action, Suniva and SolarWorld argued that, without a tariff on solar cells, remaining United States solar manufacturers could go out of business. The ITC found that cheap solar panel imports were causing injury to domestic solar manufacturers.

What has led to our current solar tariff environment?

There are a few notable events in recent history that have led to our current solar tariff environment: May 2017 - Solar cell manufacturers Suniva and SolarWorld petitioned the U.S. International Trade Commission (ITC) to impose a tariff on imported solar panels.
