What is solar energy?

Solar energy refers to heat and radiant light from the sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The Austrian solar energy market is segmented by technology and end-user.

Will the solar PV market grow in Austria in 2021?

The solar PV segment is likely to witness considerable growth in the Austrian solar energy market during 2021. The total renewable energy generation in Austria reached 13.3 TWh in 2021, and the total installed capacity of renewables was 22,014 MW in the same year.

Why can't I find a complete overview of power generation in Austria?

An up-to-date overview of the complete power generation in Austria (i.e. including those shares that are used downstream of the grid operator's meter to reduce consumption and are therefore not fed into the public grid) cannot be provided due to the insufficient database available at APG.

How many solar panels will Austria install by 2030?

According to Austria's National Energy and Climate Plan (NECP), the Austrian government is committed to installing 1 million PV systems by 2030. This is a substantial increase from the target of 100,000 roof-mounted PV systems under Mission 2030. Thus, this factor is expected to create ample opportunities for the solar market.
