
Background of Vientiane Energy Storage Subsidy

Will Lao PDR be able to export electricity to ASEAN?

The country's great potential for hydro,solar,wind,and biomass could allow Lao PDR to maximise its electricity net export on the ASEAN Power Grid. It could have 45 terawatt-hours (TWh) of expected capacity by 2030,73 TWh by 2040,and 161 TWh by 2050 under the carbon-neutral scenario (Figure 1.2).

What is energy policy in Lao PDR?

Energy policy in Lao PDR has gained much public attention since the establishment of the Ministry of Energy and Mines (MEM) in 2006. Under MEM, the country's energy policy has evolved from a singular power sector policy to broader policies supporting the development of a sustainable and environmentally friendly energy sector.

Does Lao PDR have a coal-fired power plant?

Lao PDR has a long journey ahead in decarbonising its whole energy system; it has the current 1,878-MW Hongsa coal-fired power plant as well as additional already-committed coal-fired power plants in the southern part of the country.

Where does Lao PDR energy come from?

Lao PDR's energy primarily comes from coal,oil,hydropower,and 'others' (including biomass,solar,and electricity for export). The combined shares of coal and oil are expected to fall to about 20% of the primary energy supply by 2050 under the carbon-neutral scenario.
