
Beijing substation 5g base station

How many 5G base stations are there?

Infrastructure upgrades will deploy 70 5G and 5G-Advanced (5G-A) base stations per 10,000 residents, with over 35,000 new or upgraded 5G-A base stations to ensure seamless 5G coverage within the Fifth Ring Road and 5G-A service in key areas, according to the bureau.

How many 5G base stations will China have in 2025?

China's Ministry of Industry and Information Technology (MIIT) unveiled plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. Under this plan, China aims to have 26 5G base stations for every 10,000 people by the end of 2025.

Will Beijing become a national benchmark for 5G adoption?

BEIJING -- Beijing will achieve large-scale 5G application and comprehensive 5G integration across industries by the end of 2027, positioning itself as a leading national benchmark for 5G adoption, according to a three-year action plan unveiled by municipal authorities.

What is 5G & how will it impact Beijing?

The large-scale application of 5G is expected to empower Beijing across industrial internet, humanoid robotics, smart power grids and low-altitude systems, healthcare and digital education. It will also enhance autonomous driving capabilities and support the building of 400 "5G smart hospitals."
