## Best arc flash switchgear for sale exporter

How does an arc flash switchgear work?

Generally, this type of switchgear will come with flaps that open under the intense pressure of arcing energy. The flaps allow the heated gases of an arc flash and the pressure to safely vent out of the enclosure and away from the operator. When venting arc flash gases outside of the switchgear room is necessary, extra duct work is used.

How do you protect yourself from arc flash?

Hand Protection: Arc-rated gloves. Eye and Ear Protection: Safety glasses, earplugs, or earmuffs. Foot Protection: Leather boots or insulated shoes. These protective measures can effectively reduce the risk of injury in arc flash incidents and ensure workers' safety.
