
Bloemfontein Sinco Solar Water Pump

What is a solar water pump?

The solar water pump is typically used in domestic water supply, irrigation projects and for pumping water. A solar water pump uses the energy of the sun. The electricity is provided by one or more PV panels which are connected to the electrical pump system. Solar pumps are a great alternative to the conventional method of pumping water.

What is a solar borehole pump?

Our range of solar borehole pumps is specifically designed to efficiently lift water from deep underground, providing a water source independent of the grid for farms, homes, and communities. System design considers borehole depth, water yield, and daily water volume needed.

What is a solar pumping system?

Solar pumping system consists of three parts: solar pumping controller, DC or AC three-phase pump and PV module. Even on cloudy days, it can pump 10% water flow per day. Solar panels convert sunlight to electrical energy which is passed to the solar pump controller.

What is a surface solar pump?

Surface solar pump - these sit above ground and move water through pipes. They are handy for moving large quantities of water at a slow pace and are commonly found on farms or large irrigation systems where water needs to be moved from a lake or other body to fields or landscaping.

When installing a solar water pump, consider the solar panel requirements. The system typically needs panels with 38.14V for a 340 Watts panel. Alternatively, it may require ...
