
Blown fuse in circuit breaker in Calcutta

How do you fix a blown circuit breaker?

First, locate your circuit breaker or fuse box. Depending on the age of your home, you could have either. Once located, turn off the power supply to the affected circuit by flipping the corresponding switch or removing the fuse. Next, remove the blown fuse and replace it with a new one with the same amperage rating.

What happens if you blow a fuse or tripping a breaker?

Blowing a fuse or tripping a circuit breaker is a common issue, especially if you're a multitasker. If you overload a circuit, your system will cut off the electrical flow to prevent your wires from overheating and causing circuit damage or fire. Follow these steps to restore power and get all those appliances going again:

What happens if a fuse is blown?

A blown fuse occurs when too much electrical current flows through the circuit, causing it to overheat and melt. This can happen due to an overload of appliances or faulty wiring. To replace a blown fuse, you will need to first locate the circuit breaker panel in your home.

How do you replace a blown fuse?

To replace a blown fuse in your home, cut power off from your circuit breaker and unscrew the broken fuse. Then, screw a new fuse of the same amperage into the socket. To replace a blown fuse in your car, disconnect the battery and remove the blown fuse. Then, take a new one of the same amperage and push it gently back into place.
