
Brussels school uses 100kWh photovoltaic container

Are solar panels a good investment for Catholic schools in Brussels & Wallonia?

Belfius Bank and the "Secrétariat Général de l'Enseignement Catholique" (General Secretariat of Catholic Education, SeGEC) have just finalised a major investment programme to equip most Catholic free schools in Brussels and Wallonia with solar panels over the next four years.

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

How does LZY's photovoltaic power plant work?

LZY's photovoltaic power plant is designed to maximize ease of operation. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly.
