
Bucharest New Energy Storage Industry

Why should investors invest in energy storage in Romania?

This step improves regulatory transparency, another key factor investors consider when committing capital. Romania's ambitions for energy storage are growing rapidly. The country plans to install 5 GW of battery energy storage capacity by 2026, a massive leap from its current level, which reached around 400 MWh as of April 2025.

Why is battery storage important in Romania?

This policy shift aligns Romania more closely with EU energy goals, where battery storage is increasingly recognized as an enabler of grid flexibility, renewable integration, and energy security.

How important is Romania's move to European energy storage?

For the European energy storage ecosystem, Romania's move is strategically significant. It sets a precedent for neighboring countries where outdated tariff structures still hinder the rollout of commercial and industrial ESS solutions.

Is Romania paving the way for more commercially viable energy storage business models?

By removing these financial disincentives, Romania is paving the way for more commercially viable energy storage business models--especially in the C&I energy storage segment, where project economics are highly sensitive to operational costs.

Before the new facility was commissioned, Romania's overall battery energy storage capacity was 398.8 MWh, according to data from the country's transmission system operator, ...

Nova Power & Gas is currently the national leader in battery storage capacity, with 240 MWh already operational. The company continues to expand its investment portfolio, ...

Romania has commissioned its largest battery energy storage system (BESS) to date: a 200 MW / 400 MWh project in Cluj County, developed by private investor Nova Power & ...

Nova Power & Gas, part of the E-INFRA group, has announced the commercial operation of Romania's largest battery energy storage facility, with a capacity of 200 MW and ...

Market design changes --Romania is gradually aligning with EU energy market rules, enabling battery projects to participate in balancing markets, capacity services, and ...

In a decisive move to support its clean energy transition, Romania has overhauled a key regulatory barrier holding back investment in energy storage. The National Energy ...

Romania Energy Storage Market Synopsis The Romania Energy Storage Market is experiencing growth driven by increasing renewable energy integration, grid modernization efforts, and ...

As the world accelerates toward cleaner and more resilient power systems, Battery Energy Storage Systems (BESS) have become one of the most critical technologies enabling ...

The largest battery energy storage capacity in Romania - 200 MW power and 400 MWh capacity - has been put into operation, announced Energy Minister Bogdan Ivan. ...

Nova Power & Gas, a subsidiary of the E-INFRA Group, has officially commissioned Romania's largest battery energy storage system (BESS), a 200 MW facility with 400 MWh of ...

Muresan outlined ambitions to establish the company as a leading electricity and gas producer in Romania, while also pursuing accelerated expansion across the region. Currently, ...
