
Cambodia outdoor camping solar air conditioning

Is solar a good option in Cambodia?

In the middle of Cambodia, including the load center of Phnom Penh, which is responsible for approximately 70% of national electricity demand, the peak solar resource measures over 1,900 kWh per square meter per year. Solar is also a good option for remote rural households that do not currently have access to the grid.

Who is ecosun (Cambodia)?

Since 2008, EcoSun (Cambodia) Co., Ltd has been providing Cambodian households with a comprehensive range of solar-powered appliances and solar solutions. From energy-efficient appliances to sustainable solar and hybrid systems, we provide solar energy solutions tailored to meet any energy needs.

Are portable air conditioning units a good option for camping?

Take places like Texas, Arizona, and Florida, where summer daytime temperatures often soar above 90°F (32°C). Sleeping in a stuffy tent or RV without cooling isn't just inconvenient--it can be dangerous. That's why many modern campers are turning to portable air conditioning units as part of their essential camping setup.

Can You Power an AC while camping?

Powering an air conditioner while camping--especially off-grid--can be a challenge, but it's absolutely doable with the right setup. Here's a general idea of power draw for common camping ACs: Most AC units have a high surge or starting wattage. This means your power source needs to support a peak load when the AC first turns on.
