
Can cylindrical lithium batteries be placed sideways

Can You mount a lithium battery on a side?

Yes, you can mount your lithium battery on its side, provided it is properly secured. Unlike traditional flooded batteries, lithium batteries are designed to be versatile in installation orientation. However, always consult the manufacturer's guidelines to ensure that side mounting does not affect performance or safety.

Where should a lithium battery be placed?

This gives you the flexibility to install the battery where it is best suited for your application. Here are further details regarding Battery Orientation from our User Manual: Lithium batteries can be placed upright or on their sides. Do not install batteries in a zero-clearance compartment, overheating may result.

Is side mounting a lithium battery safe?

While side mounting is generally safe for lithium batteries, there are some considerations to keep in mind: **Secure Installation:** Ensure the battery is firmly secured to prevent movement during operation. **Ventilation:** Although lithium batteries do not emit gases like flooded batteries, providing some ventilation can still be beneficial.

Should a battery be placed on a long or short side?

Many can be placed on EITHER the long side or the short side - NEVER BOTH. Placing a cell/battery on its side depends on the manufacturer's cell construction AND the battery builder's orientation of cells within the pack. ALL cells are designed/constructed to work optimally with the vents and terminals up.
