
Can solar panels be used as house tiles

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Can solar panels be installed on roof tiles?

Roof tiles, such as those from Brava Roof Tile, have specific designs to allow water to flow freely from the tiles to the gutters and down the drainage spout. Installing solar panels on top of the tiles prevents water from reaching the tiles, leading to inefficient flow and potential seepage into the roof.

How do solar tiles work?
