
China thermal circuit breaker in New-Zealand

What are the different types of thermal breakers?

Thermal breakers protect circuits from excess current in a similar way to a fuse, however, they often feature a switch allowing them to be reset if tripped. Common types of thermal breakers include thermal magnetic circuit breakers and thermal automotive circuit breakers.

What are thermal magnetic circuit breakers?

Thermal magnetic circuit breakers are devices that provide protection against overcurrent in circuits. Circuit breakers use an automatically operated electrical switch to disrupt the flow of current when an overload or short circuit is detected. Thermal magnetic circuit breakers do this using an electromagnet and bimetallic strips.

What are thermal automotive circuit breakers?

Thermal automotive circuit breakers are devices used to break the flow of current in automotive circuits, in order to protect them against a fault such as overcurrent or short circuit.

What type of circuit breaker does Etek offer?

ETEK Electric provides Thermal magnetic Fixed Type, Thermal and Magnetic Adjustable Type, Electronic adjustable type, and DC moulded case circuit breaker with a current rating of up to 2000A. Talk to Our Expert.

A wide variety of circuit breaker thermal options are available to you, such as c, b and d. You can also choose from home, protective and industrial circuit breaker thermal, as well as from li, lsi, ...

These breakers are used instead of miniature circuit breakers (MCBs) in large scale PV systems for system isolation and protection purposes. ETEK Electric provides Thermal magnetic Fixed ...
