
Container house with solar

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which is what we ended up doing for him. (See in image with tan container.)

Why should you choose a container home?

Container homes make it possible to create a secluded retreat or a remote homestead. Built to comply with building codes, they offer the versatility needed for any location. Affordability: Save thousands each year with no utility bills. Off-grid living helps reduce costs while offering a high-quality, energy-conscious lifestyle.

Who is custom container living?

Founded by Robert Wagoner in 2015, Custom Container Living is dedicated to delivering exceptional, environmentally conscious homes. From solar power integration to innovative water systems, our homes are designed to help you reduce your reliance on external resources and thrive off the grid.
