## DC uninterruptible power supply 13 85a

What kind of battery does a DC UPS use?

Our DC UPS systems for 12V /24V /48V provide an uninterruptible power supply and ensure fail-safe availability of process-critical systems and components. Maintenance-free supercaps, long-life and safe LiFePO4 and lithium-ion battery packs, or classic lead-acid batteries are used.

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.

What is an all-in-one UPS power supply?

These all-in-one UPS power supplies incorporate a DIN rail mounting switch mode power supply and UPS controller into a single unit. Customers can also buy a maintenance free battery pack and holder to create a cost effective and fully integrated UPS solution. One of the main

Which batteries are used in a decentralised UPS system?

Maintenance-free supercaps, long-life and safe LiFePO4 and lithium-ion battery packs, or classic lead-acid batteries are used. Our decentralised UPS systems provide effective protection against power failure, flicker, fluctuation, or voltage dips in DC power supplies.
