# Does Huawei's vanadium battery need to be packed

Does Huawei make batteries?

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R&D resources into developing a new solid-state battery tech. The newest patent reveals a battery pack that can go for 1,860 miles away from the plug and fully charge in just five minutes. This is perhaps one of the craziest technologies we've heard so far.

Can Huawei solve problems with solid-state batteries?

Additionally, the company has potentially solved some glaring issues with solid-state batteries. By doping sulfide electrolytes with nitrogen, Huawei improves electrochemical stability and safety and significantly slows down degradation, two of the biggest hurdles keeping solid-state tech from commercialization.

Will Huawei make EV batteries?

With the patent filed, it's not known what the tech giant plans next as Huawei does not currently have any manufacturing facilities that are suitable for mass-producing batteries for the car industry. Its involvement in the EV industry is as technology supplier and partner to several Chinese makers rather than building its own vehicles.

What is Huawei's new EV battery?

Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that blends an incredible range of up to 3000km with a charging time of just five minutes.

How to store lithium-ion batteries? Keep reading to learn about the scientific storage methods for lithium-ion batteries in data centers, the risks of improper storage of lithium-ion batteries, and ...

Huawei's design aims to boost safety and cycle life by mitigating degradation at this critical junction. Huawei's involvement in solid-state battery research reflects a broader ...

A Chinese company called Huawei has received patent approval for a solid-state battery chemistry that some media is claiming supports a range of around 3,000km and a ...

Traditional "wet" solid-state cells still suspend ceramic or sulfide particles in a gel electrolyte. Dry designs press a thin, fully dense solid electrolyte directly against a lithium ...

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R&D resources into developing a new solid-state battery tech. The newest patent reveals a battery ...

China's tech giant claims 1,800-mile range for solid-state EV battery, files patent Huawei's patent application reveals that its battery uses a method of doping sulfide ...

---

Its batteries are actually provided by CATL. As a key part of electric vehicles, Huawei naturally cannot be completely without technical reserves in this regard. At the end of ...

Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW, ...

In related news, Huawei Digital Power, in collaboration with SchneiTec, recently commissioned Cambodia's first T&#220;V S&#220;D-certified grid-forming energy storage project on ...
