
Double-layer container generator

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is a container-type diesel generator set?

The outer shape of the container-type diesel generator set is the standard size of the container, and there is no need to order a special container space during sea transportation, which greatly saves transportation costs. 3.

What is a SOLLANT container diesel generator set?

The SOLLANT container diesel generator set has a compact and beautiful appearance through careful design. The box body adopts a detachable structure and is made of steel plates. The surface is sprayed with high-performance anti-corrosion and anti-rust paint.

How does a generator work?

A generator provides standby power until the mains power can be reinstated during a power outage. This is supported by a UPS (Uninterruptible Power Supply) which ensures a seamless transition from your mains power to your backup power supply. Batteries provide power to your UPS and generator.
