
Dubai container refrigeration generator

Which generator sets are best for refrigerated container units?

The most rugged, dependable and easy-to-operate generator sets for refrigerated container units. Carrier's industry-leading PowerLINE Generator Sets are designed and built for continuous, unattended operation for all refrigerated containers transported by road or rail worldwide.

What is a genset on a reefer container?

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as during transport. Our Gensets run on diesel, gasoline or gas. Disc type radial fan for cooling: Sealed large diameter rear bearing.

Why should you choose a container genset?

Portability: Container gensets can be easily attached and removed, allowing for seamless integration into various transport modes. Reliability: Designed for continuous operation, they ensure an uninterrupted power supply for reefers.

Refrigerated containers (reefers) rely on generator sets (gensets) for power when transported or stored without access to a fixed electrical grid, such as during sea, rail, or road transit. Clip-on ...

Carrier's industry-leading PowerLINE™ Generator Sets are designed and built for continuous, unattended operation for all refrigerated containers transported by road or rail worldwide.

Leading suppliers and manufacturers of Containerized Generators in the UAE and Dubai. Our high-quality Containerized Generators are ideal for various industrial applications. Get in touch ...
