
EU solar Module Project

Who is Solarpower Europe?

SolarPower Europe is a partner of this 4 ½ year Horizon Europe project, which will aim to: PV technology systems, for example on heritage buildings! Questions? Get in touch. Questions? Get in touch. ETIP-PV (European Technology and Innovation Platform for Photovoltaics) is the solar PV sector's representation to the European Commission.

How can Europe regain its leadership in solar technology?

To tackle these challenges,the EU-funded EMPOWER projectwill develop tools and processes to transform PV manufacturing. By simplifying silicon wafer production,reducing silver usage,and improving efficiency,EMPOWER aims to cut costs and waste while boosting sustainability. This will help Europe regain its leadership in solar technology.

How will the EU Impact PV installations in 2024?

In 2024,the EU set a new growth benchmarkfor PV installations,fueled by rising energy demand and increased investments in renewable infrastructure. Ambitious climate targets and supportive frameworks,such as national energy plans and EU-led incentives,have accelerated adoption.

Why is solar energy a key priority in the EU?

Solar energy has emerged as a cornerstone of EU's strategy to achieve its climate goals and reduce dependence on fossil fuel imports. These efforts have been supported by policy measures,including financial incentives and revised renewable energy targets from EU member states,making solar PV deployment a key priority across the continent.

A comprehensive analysis of the 2025 European commercial and industrial photovoltaic policy map, focusing on deployment strategies, incentive comparisons, and zero ...

The EU's CBAM will be the first fully operational border carbon adjustment policy to charge costs based on the emissions intensity of imported goods. Many other jurisdictions ...

The European Union has indefinitely frozen Russia's assets in Europe to ensure that Hungary and Slovakia, both with Moscow-friendly governments, can't prevent the billions of ...

Designated by the French government as a "Project of National Interest" receiving priority support, this initiative holds significant strategic importance for strengthening Sino ...

Funded by the European Union, the project brings together 22 leading global partners, all working to enhance the efficiency and stability of large-area perovskite solar ...
