# Energy storage container installation in Chile

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses.

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

Is lithium ion battery storage available in Chile?

While many projects are under development, lithium-ion battery storage is still limited. According to data from Acera, the Chilean Renewable Energy Association, there are only 64 MW of battery storage capacity currently active, representing 0.2% of national capacity.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

The project construction started in October 2024 and equipment installation was completed in 70 days. The project represents significant progress for China's first 100 MW-scale energy storage ...

Electric utility Engie Chile said on Tuesday it has begun battery installation at its 34-MW BESS Arica stand-alone energy storage project in the far north of the country, after ...

Chile's energy storage sector is experiencing significant growth, as outlined in the latest "Report on Projects Under Construction and Investment in the Energy Sector" by the ...

Between 2023 and 2030, 5.9 GW and 24.7 GWh of energy storage is forecast to be installed: o Chile's administration considers storage strategic for the country's goals (at least ...

The sharp growth in renewable energy production, and the pursuit of ambitious global targets on new capacity, bring with them a significant challenge, alongside huge ...

Trina Storage has shipped the first 1.2 GWh batch of its self-developed Elementa 2 Battery Energy Storage System (BESS) to Chile, marking the company's largest overseas ...

The project, developed by Sojitz Corporation and Shikoku Electric Power Co., Inc. through their subsidiary AustrianSolar Chile Cuatro SpA ("ASC4"), is set to commence ...
