
Energy storage equipment in Auckland New Zealand

What is a scalable solar energy storage system?

With scalable solar energy storage systems that cut costs, boost resilience, and gives farms and businesses full control over your energy use. Ernest Energy provides turnkey solar and battery energy storage systems (BESS) tailored for New Zealand's commercial and agricultural sectors.

What is a battery energy storage system?

A battery energy storage system (BESS) is a technology that allows for the storage of electrical energy in batteries, which can then be used to power electrical loads. BESS can be used for a variety of applications, including grid stabilisation, load shifting, backup power, and integration with renewable energy sources such as solar and wind power.

Why do you need energy storage systems?

Our energy storage systems are compatible with storing energy from renewable sources, making them an ideal solution if you want to reduce fuel consumption of a diesel generator, add reliability to a hybrid system or microgrid, or to simply optimise your business case through smart energy management - our solutions are at your service!

How many MW is a battery energy storage system?

It will have a total installed capacity of between 200-300MW. The BESS will connect to an existing 220 kV line via a new 33kV underground cabling into a new switching substation, and then into the Transpower substation, and onto the national grid. Why build a Battery Energy Storage System now?

Enabling the shift from fossil fuels to electricity, including energy storage, distributed energy technologies and systems, electrification of transport, and network optimisation.

New Zealand aims to transition to renewable energy, and battery storage plays a vital role in this effort by enhancing grid stability and integrating intermittent renewable sources like wind and ...

Explore our range of modular & scalable industrial battery energy storage solutions designed for conventional & renewable energy storage. Bess for hire across NZ - enquire today!

Ernest Energy provides turnkey solar and battery energy storage systems (BESS) tailored for New Zealand's commercial and agricultural sectors. Our integrated solutions reduce energy ...

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka on North Island. Saft lithium-ion technology will ...

Need an energy supplier in Auckland? Discover trusted providers offering solar systems, battery storage, and smart meters for homes and businesses. Click to compare ...
