
Energy storage equipment manufacturing company in Osaka Japan

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

What is Itochu & Osaka Gas?

With this business, ITOCHU will design and supply energy storage system and power conditioners from its own procurement network, and will also build and maintain an optimal storage system. Osaka Gas will oversee trading in the energy market and control of the storage plant by utilizing its knowledge of the energy trade.

Where are Japanese batteries made?

In 2020, it became the first Japanese company to ship a cumulative total of 200 billion dry batteries worldwide. With production at the Moriguchi Factory, which had met domestic demand for over 90 years, terminated, a new factory has been set up at the Nishikinohama Industrial Park in Kaizuka City, Osaka Prefecture.

Why is Itochu working with Osaka Gas & Tokyo Century?

ITOCHU will work on this business together with Osaka Gas and Tokyo Century to ensure that the balancing power produced through this business can contribute to the further introduction and stable supply of renewable energy.
