# Energy storage planning for East Timor's power system

Why should Timor-Leste invest in solar & storage infrastructure?

José added: "The investment in Timor-Leste's solar and storage infrastructure is transformative. It will help reduce dependence on fossil fuels while improving grid stability and energy access across the country". José de Ponte was supported by special counsel Marnie Calli, senior associate Lisa Huynh and solicitor Jeraldine Mow.

How much electricity does East Timorese use?

In 2022, its electricity consumption was 414.76 million kilowatt-hours. Imported fossil fuels are the primary source of energy for the country, but access to this energy is highly uneven. A majority of East Timorese live in rugged mountainous areas, and only 5 percent of these households are connected to the electricity grid.

Where is East Timor located?

East Timor (Timor-Leste) occupies half of the mountainous island of Timor, which is the size of Connecticut and lies roughly 400 miles northwest of Australia and about 1,000 miles due south of the southernmost tip of the Philippines.

Does Timorese need energy diversification?

The Timorese government recognizes the need for energy diversification and has committed to developing renewable energy sources as part of its strategy to enhance energy security, protect the environment, and improve access to electricity.
