
Environmentally friendly solar energy system application in Barcelona ??Spain

Can solar energy be a new forum for energy in Barcelona?

In recent decades, Barcelona began implementing laws to promote the installation of solar-energy systems in major buildings as a new forum for energy instead of relying on electricity and gas.

Can solar energy be used in a new building in Barcelona?

Legally speaking, building owners must install systems for collecting solar energy to produce clean water and electricity in new or renovated buildings whose uses, residential or commercial, have undergone major changes. Barcelona has the opportunity to turn homes into small clean-energy generation plants to offset the energy consumed daily.

Does Barcelona have solar energy?

Spain's solar energy plants are located in the southwest of the country, but Barcelona can produce their own energy from here in the northeast. The city is committed to developing new, eco-friendly sources of energy at home and has pushed forward with their green energy plan.

Are roof terraces a good source of solar energy in Barcelona?

The Barcelona City Council has been promoting all housing roof terraces as a local resource for installing photovoltaic solar energy panels, where solar radiation is caught and turned into direct-current electricity. Related article: [Do You Know About Barcelona's Green Points?](#)
