Is Poland moving towards battery energy storage systems (Bess)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

Where are Bess projects located in Poland?

The geographical distribution of BESS projects in Poland is concentrated in regions with high renewable energy potential, such as Lower Silesian, Masovian, and Pomeranian. These areas are pivotal for Poland's energy transition, offering the infrastructure necessary for significant BESS installations.

What role does Bess play in Poland's energy transformation?

This transition requires effective storage solutions to manage the intermittency of renewable sources like wind and solar. The state's investment of approximately \$4.7 billion in battery storage projects underscores the critical role of BESS in Poland's energy transformation.
