
High-efficiency folding container for oil refineries

What is a crude & HFO storage tank?

The Crude & HFO Storage Tank from TEC Container Solutions provides high-capacity, insulated static storage for crude oil, heavy fuel oils (HFO), and other high-viscosity products. Built with a double-walled, fully bundled design, it ensures environmental protection while maintaining stable product temperatures even in harsh conditions.

What are oil refinery storage tank sizes?

Oil refinery storage tank sizes vary widely based on their purpose, location, and operational requirements. Crude oil storage tank capacity can range from small tanks that hold a few thousand barrels to massive structures designed to accommodate millions of barrels of oil.

Why are oil storage tanks important in the refining industry?

In the refining industry, oil storage tanks are indispensable for containing large volumes of flammable liquids within the oil supply chain. These units enable safe operation in production, transportation, distribution, and storage of strategic hydrocarbons.

What are oil storage tanks?

Hydrocarbon storage tanks are industrial containers designed to safely store products such as crude oil, gasoline, or diesel fuel. They are cylindrical and vertical, with fixed or floating roofs, and operate at atmospheric pressure.
