
Household 50w solar light

What is a 50W solar energy system?

A 50W solar energy system is specially designed for places without electricity, such as villages still using kerosene lamps. It is sufficient enough to power one small hut to light and charge a mobile phone for a full night. The system consists of monocrystalline panels and comes with a DIY installation module.

Is a 50W solar panel enough?

If you are charging a higher capacity battery, a 50W solar panel won't be enough. You can either buy a 100W solar panel like the Rockpals 100W Solar Panels or another 50W and connect the two.
