# Household solar container energy storage system in Sydney Australia

Why is home solar battery storage so popular in Australia?

Home solar battery storage is becoming increasingly popular in Australia to reduce reliance on the grid, save money on electricity bills, and protect against power outages. As of early 2025, approximately 185,800 home battery systems have been installed across Australia, marking a significant surge in adoption.

What is a solar container?

Designed for mobility, our solar containers are easy to transport and install, making them ideal for remote locations or temporary setups. Perfect for off-grid projects, backup systems, or renewable energy initiatives, our solar containers offer a sustainable and reliable energy option.

What types of energy storage systems does sigenergy offer?

Sigenergy offers home battery storage, residential ESS, and commercial solar solutions. Explore our innovative energy storage systems for sustainable power management.

How many kWh is a solar battery in Australia?

In Australia, the average battery capacity is between 10kWh and 14kWh. This is enough to store the energy generated by a 6.6kW to 10kW solar system on a sunny day. However, if you have a larger household or want to store energy for several days, you may need a larger battery.
