
How to start the base station power supply

How do I set up a base station?

Connect the base station to the mains power supply. Wait several minutes until the Charge status LED lights up. For quick-charging the headset: Briefly press the Set button at the rear of the base station. Connect the base station to the mains power supply. Reduce the distance between headset and base station.

How do I power cycle my base station?

To power cycle your base station, unplug the power adapter from the outlet, wait two minutes, and reconnect the power adapter to the outlet. The base station takes one to two minutes to start. When the power LED and Internet LED light solid green, your base station is connected to the Internet.

Can I Turn On my ATX power supply without a motherboard?

There you go, two simple methods to turning on your ATX power supply without having it connected to a motherboard. Being able to do this has been extremely helpful to me as a reviewer, however it also comes in handy if you run a high power Thermoelectric Cooler (aka TEC or pelt) that requires the use of a 2nd PSU.

How do you turn a PSU on a motherboard?

As most of you probably know, you cannot simply plug in a PSU to the wall and turn it on. The PSU needs a connection to the motherboard to be told to turn on. When you press the power button on your case, it jumps the green wire to a ground, telling the PSU to turn on. When this "jump" is broken, the PSU shuts off.
