# Irish energy storage project subsidies

What is energy storage Ireland (ESI)?

1. Introduction Energy Storage Ireland (ESI) is a representative association of over 70 public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland.

What is energy storage Ireland 2025?

At Energy Storage Ireland 2025, the message was clear: energy storage is central to a stable, low-carbon grid, and while short-duration battery systems (BESS) are available, long-duration storage (LDES) supply is in its infancy, however ESN has a structure to enable LDES rollout in Ireland. The technology is advancing fast.

What changes are needed to increase energy storage development in Ireland?

The focus group participants noted several key second stage policy areas that required changes in order to increase the amount of energy storage development in Ireland. These included legislative changes, adjustments to the planning approval process, the development of forecasting models, grid improvements and the introduction of targets.

When will long duration energy storage be available in Ireland?

The Irish Electricity Storage Policy Framework, published after this data was collected, indicates that an immediate route to market for 500 MW of long duration energy storage is currently being developed, with further studies planned to support long duration storage from 2030 to 2040 (Government Of Ireland 2024a).

At peak delivery, the project is expected to support up to 30 full-time jobs. Heather Donald, Director of Projects Onshore Ireland at SSE Renewables, said: "Securing a final ...

The energy storage sector across Europe faces many financial, regulatory and policy barriers which has to date hindered development in many countries. This study ...

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the ...

Recently, Ireland's Sustainable Energy Authority (SEAI) announced that the country's 2026 residential solar photovoltaic subsidy policy has been officially confirmed, ...

The Electricity Storage Policy Framework 2024, prepared by the Department of the Environment, Climate and Communications (DECC), provides a roadmap for integrating ...

The secret sauce often lies in new energy storage project subsidy schemes. In 2025, global investments in energy storage hit \$48 billion, with subsidy programs driving 63% ...

Taking a specific photovoltaic energy storage project as an example, this paper measures the levelized cost of electricity and the investment return rate under different energy ...

---

Achieving net-zero emissions through energy transformation necessitates a multifaceted strategy, including removing energy supply chain subsidies, accelerating energy ...

SSE has approved final investment for the 100MW Derrymeen battery storage project in Northern Ireland. The facility will provide 200MWh of storage to balance the grid and ...
