
Main breaker switch for sale in Melbourne

What is a Clipsal circuit breaker & main switch?

These Clipsal Circuit Breakers & Main Switches are designed with a 6kA breaking capacity. This protects your electronics and the Clipsal Circuit Breakers & Main Switches against short circuits, power surges, and overcurrent. We offer top-of-the-line Clipsal circuit breakers that can safely interrupt fault currents of up to 6000 Amperes.

What is the difference between a main switch and a circuit breaker?

A main switch (or isolator) is designed purely to switch power on and off manually--it does not provide overcurrent protection. A circuit breaker automatically trips during overload or fault conditions to protect circuits. Main switches are used for isolation during maintenance and servicing, allowing electricians to safely de-energise circuits.

Who offers Clipsal circuit breakers & main switches 6KA?

At AGM Electrical Supplies, we offer Clipsal Circuit Breakers & Main Switches 6kA that are trusted by contractors, electricians, and builders all across Australia. Whether you are working on a residential job, industrial site, or commercial project, AGM Electrical Supplies offers you the quality and safety you deserve.

What is a circuit breaker used for?

A circuit breaker automatically trips during overload or fault conditions to protect circuits. Main switches are used for isolation during maintenance and servicing, allowing electricians to safely de-energise circuits. Circuit breakers protect against electrical faults but aren't designed for frequent switching operations.

Main switch MCBs (miniature circuit breakers) are essential circuit protection devices that safeguard electrical installations by automatically interrupting power flow when overloads or ...
