
Motorhome solar air conditioning

Can solar power an RV air conditioner?

For RV owners, installing a solar panel on your RV roof is a great way to reduce your energy costs and increase your ability to live off-the-grid. But can solar power really generate enough wattage to power large appliances like your RV air conditioner? So can you power an RV air conditioner with solar?

Do I need a solar panel for my RV?

At minimum, you have the solar panels themselves and a collection of batteries (often known as a 'battery bank') that provides power directly to all of your RV's 12-volt DC electronics. In order to power any 120-volt AC electronics, like your air conditioner, you'll need to install an inverter as well.

How do solar panels help motorhome owners?

Solar panels help motorhome owners to power various appliances and systems within their vehicles, without relying solely on external power sources. They can also be used to top up the charge of your leisure batteries.

Where can I get solar panels fitted for my motorhome?

At Motorhome Workshop, you'll find a one-stop solution for your off-grid power needs, so you can have motorhome solar panels fitted with confidence and convenience. We offer solar panels on a supply + fitting basis, for all types of motorhomes, campervans and caravans. Our range of 12v kits shown below, all include fully warrantied panels.
