
North Africa Communications Building 5G Base Station

How big is the 5G base station market?

Macro cells represented USD 22.9 billion and 61.3% of the 2024 5G base station market share, providing umbrella coverage and mobility anchor services. Yet small cells are forecast to expand at a 29.4% CAGR, pushing their slice of the 5G base station market size toward USD 50 billion by 2030.

How many 5G networks are there in Africa?

There are now commercial 5G networks in more than 10 countries in the region, with stakeholders in many more countries expecting commercial 5G to be available in their markets by 2025. By the end of this decade, there will be more than 340 million 5G connections in Africa, equivalent to a fifth of total mobile connections.

Will arm launch 5G solutions Labs in Africa?

Arm has ambitions to launch 5G solutions labs across Africa, starting with South Africa. Realising the potential of 5G in Africa depends on customer adoption and usage, which in turn strengthens the business case for network rollout. As with previous mobile generations, the consumer market will be an important growth driver for 5G.

Who is involved in 5G in Africa?

There are a number of multilateral stakeholders and organisations that engage with and represent various parts of the 5G ecosystem. In Africa, these include the African Telecommunications Union (ATU), the ITU, the GSMA, Smart Africa and sub-regional digital and communications authorities.
