
Outdoor solar lights are always on

What do you need to know about outdoor solar lights?

This guide provides everything you need to know about outdoor solar lights. Using photovoltaic (PV) devices, you can illuminate and decorate your home without incurring additional energy bills. Solar lights come in a variety of styles, making them suitable for every outdoor space in your home.

How do outdoor solar lights work?

Outdoor solar lights work by converting sunlight into electricity. Each light comes with a solar panel that absorbs energy during the day, converting it to electricity which is then stored in a rechargeable battery. At night, the battery powers the lights.

How to choose the best outdoor solar light?

When choosing the best outdoor solar light, consider one that senses movement over a longer distance and with a larger sensing angle. However, other factors like the size of your outdoor space can also influence your choice. Make sure to choose a light that suits your specific space and doesn't sense movement across the road or in your neighbor's property.

Do solar lights stay on all night?

Solar lights you find online or at a big box retailer cannot maintain a light level throughout the night. A commercially designed system is the only thing on the market that can maintain light levels. Let's go over how to guarantee your solar lights will stay on all night.
