# Procurement of 40kWh Foldable Container for Wastewater Treatment Plant

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

How long does a containerized wastewater treatment plant take?

We offer a variety of capacities that can meet your requirements. As the pre-assembled containerized wastewater treatment plant is located inside a standard 20 or 40 foot shipping container, it can be relocated and installed with ease at other locations. In most cases it is a one to two-day operation and requires only a flatbed truck and a crane.

How many m<sup>3</sup> of wastewater can a containerized wastewater treatment plant handle?

We have experience with containerized wastewater treatment plants for up to 1,380 PE or 207 m<sup>3</sup> of wastewater per day. A wastewater treatment plant is only as effective and efficient as the installed system.

What is a containerised portable sewage treatment plant?

A containerised portable sewage treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable wastewater volumes to achieve any effluent quality.
