
Replace the uninterruptible power supply

What is an uninterruptible power supply (UPS)?

At RS, we know that Uninterruptible Power Supplies (UPS) are a vital backup solution. That's why we've partnered with the power management experts at Eaton to help you choose a UPS that'll keep your data and hardware safe at the most critical times. What is an Uninterruptible Power Supply?

How do you choose an uninterruptible power supply?

When choosing a uninterruptible power supply, IT teams can evaluate two criteria. One is the life of the unit itself - up to ten years. The second consideration is batteries. Every UPS unit has a battery, which as mentioned, must be replaced up to three times.

How long does an uninterruptible power supply last?

Like all other IT equipment, an uninterruptible power supply (UPS) has a finite lifespan. The average expected lifecycle of a UPS is eight-to-ten years. The batteries typically need to be replaced at least three times during that lifespan. Of course, once a UPS reaches the end of its lifespan, it should be replaced to mitigate downtime.

Is a ups a battery-operated power supply?

A UPS isn't designed to provide long-term backup use of connected devices for extended periods without power, or offer a battery-operated solution for continuing to work off-grid.
