
Self-use solar roof system

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.

Can a solar roof be used with a Powerwall?

Combine your Solar Roof with Powerwall--a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7. With the Tesla app, you can monitor your energy production in real time. Control your system from anywhere with instant alerts and remote access.

What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

What is a whole roof solar system?

Whole roof solar systems mean that your Solar PV panels become the fabric of your roof, serving two purposes, weather proofing and energy supply. The Solar PV panel frames are bespoke for the mounting system so there is a limited choice of panels with these set ups. Luckily there are still good quality panels to choose from.

Projects: New buildings or stores with a refurbished flat roof. Requirements: The customer expects a high energy self-consumption rate thanks to the PV plant on the rooftop. ...
