## Senegal joins solar air conditioning

Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development was recently signed. The Kolda project will encompass a 60MWp PV solar plant coupled with a 90MWh storage system.

When will a solar power plant be built in Senegal?

"This agreement paves the way for the construction to begin in May 2025, with the deployment of a 60MWp photovoltaic plant coupled with a 90MWh storage system." Voltalia is to supply the PV infrastructure for the solar power plant, which will operate on Senegal's national grid managed by SENELEC.

Is Senegal ready for a solar energy transition?

This transition is expected to be fueled by the Just Energy Transition Partnership (JETP) as well as private sector investment. Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually.

Does Senegal have solar power?

Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually. In 2023, solar power made up 47.4 percent of the country's renewable energy portfolio, followed by hydro and wind power.
