
Sitong uninterruptible power supply price

What is the difference between maintenance-free and sitop power supply units?

The main difference from maintenance-free SITOP power supply units is in the ability of DC UPS by Siemens to maintain a reliable 24V DC up to few hours in spite of few minutes available in units without batteries. You can choose among SITOP DC UPS series by the battery modules' volume but this is not the only option for choice.

What is a sitop 24 V power supply?

Country of Origin: AT SITOP 24 V power supplies can be expanded with an uninterrupted power supply (DC UPS) with battery modules for bridging power failures in the order of hours. They prevent expensive downtimes and undefined plant states. In addition, the innovative SITOP UPS1600 offer new options for diagnostics and system integration.

How to choose sitop DC UPS?

You can choose among SITOP DC UPS series by the battery modules' volume but this is not the only option for choice. There are also models in the series that can be connected to the automation software such as TIA portal via Profinet/Ethernet.
