
Solar Panel Class B

What is a Grade B solar panel?

Grade B solar panels have visual defects but meet performance specifications. These solar panels are less common than grade A solar panels but are typically available from manufacturers upon request. Most manufacturers keep these panels for testing purposes but sell them with warranties like grade A solar panels.

Do grade B solar panels affect performance?

Grade B solar panels have some visual defects that do not affect performance. Grade B naturally falls below grade A in this grading system. So how does Grade B stack up against the other grades? Grade A solar panels are entirely free of defects. Grade B has some visual flaws but still meets performance standards.

What kind of solar panel is called a Grade?

The grades of solar panels can be divided into A grade, B grade, C grade and D grade, and A grade solar modules can be divided into two grades, A+ and A-. The cost gap is also very large. So what kind of solar panel is called A grade, and what kind of solar panel is called D grade? Here is a brief introduction for you:

Do you sell grade B solar panels?
