## Solar roof glass sun room audio-visual room

What type of glass is used in a sunroom?

The glass used in the sunroom can be any industry available glass. Laminated glass is typically used in the roof. Upon impact, such as a falling tree, the glass will crack but should not break, leak, or fall on a bystander. LowE glazings can be used in the roof and walls. This is a very sensible glass for home owners.

Can a sunroom be a retractable roof?

where you can see the beauty of every season through the glass of your Sunroom. The glass roof can be stationary or retractable. The Sunroom is a watertight system that can protect you from harsh weather. "Our guests love it. The skylight extension has become the favorite part of the event venue." Other RAL colors and wood finishes are available...

What is an aluminum sunroom?

All sunrooms are constructed from durable aluminum frames. An aluminum sunroom will not rust, warp, rot, or require constant finishing maintenance. The framework will withstand snowstorms in Montana and extreme temperatures in New Mexico. Snow loads, wind loads, and hurricane requirements can typically be met by our in-house engineers.

What is a good U-value for a sunroom?

The typical U-value is 1.6. If you can't build your sunroom in the location that will keep it the most comfortable, or you want more hours to enjoy your all-season room, consider these options: Add operative skylights to act as heat dumps when the room gets too warm. Intersperse prefabricated insulating roof panels among the glass roof panels.
