# Solar systems for security lighting

How to choose a solar security light?

Most solar security lights provide a detection angle of 120°-180° around the unit. Along with the angle in which the light will be positioned, you also need to look at the detection distance. Some lights may only detect within 20 feet of the light, which still provides good lighting for entranceways, walking paths, and areas near the home.

What is a solar powered security light?

This product is great for those looking for a unique solar powered security light. The security light has a powerful solar panel element and motion sensors to detect movement. With waterproofing and weather resistance capabilities, it is easy to install anywhere, as long as there's sunlight to charge it where it is installed.

What are the best solar powered security lights?

Our top pick for solar powered security lights are HMcity 120 LED Solar Lights. They come with a motion sensor to activate when something passes by at night. Just one of these outdoor security lights can illuminate 200 square feet, bundled together, you can light up 800 square feet of your front or backyard.

Are solar panels a good choice for security lights?

The smaller a solar panel is, the less power it generates, and since you don't want to use a giant panel for a small light, LEDs and solar panels are a perfect fit. LED bulbs are also brighter and last longer than incandescent bulbs, two other features that are just right for security lights.
