
Taipei Hospital Uninterruptible Power Supply Equipment

What is an uninterruptible power supply?

Uninterruptible power supplies keep a steady current flowing to maintain performance over time. In addition to diagnostic equipment, UPS systems provide battery backup for life-sustaining medical equipment in the event of an emergency.

What is a Cyberpower medical grade UPS system?

CyberPower Medical Grade UPS systems have been designed to power and protect sensitive equipment in hospitals and healthcare facilities. Each medical UPS is UL 60601-1 tested to provide standby power in patient-care settings and comes with hospital-grade plugs and hospital-grade outlets, and a built-in isolation transformer.

Why do doctors need uninterruptible power supplies?

Doctors, nurses and patients rely on the critical information these sensitive machines provide and often cannot wait for them to bounce back after a power surge or outage. Uninterruptible power supplies keep a steady current flowing to maintain performance over time.

Why do medical facilities need a power supply?

In medical facilities and hospitals, there are many devices and equipment used to treat patients and protect their lives. In order for these to operate stably, it is extremely important to secure a power supply. Stopping equipment due to unexpected power outages or other power problems puts patients at risk, so this must be avoided.
