
Transformer breaker for sale in Norway

Who is Norsk Trafo service?

Long-Term Partnership For more than 8 years, Norsk Trafo Service and Whiting Equipment Canada have worked together in the North American market, and delivered many units. This strong and proven partnership combines transformer expertise with industrial furnace technology - delivering complete and reliable solutions for the industry.

Who supplies transformer cores?

Transformer cores are supplied by the best and most trusted providers in Europe. We provide comprehensive service and installation for all types of customers, carried out both at our factory and directly on-site. Our service solutions ensure reliability and extended lifetime for every transformer.

Are Transformers made in-house?

Every stage of the engineering process is completed in-house to ensure quality and precision. Our production covers both shell-type and core-type transformers, with all windings manufactured in-house at our own winding workshop. Transformer cores are supplied by the best and most trusted providers in Europe.

What makes our Transformers unique?

All our transformers are custom-built to meet each customer's unique requirements, covering both electrical and mechanical design. Every step of the design and engineering work, including detailed 3D modeling, is carried out in-house. Our engineering team develops transformer solutions optimized for performance, safety, and durability.
