
Uninterruptible Power Supply BATTERY SW

What is an uninterruptible power supply (UPS battery backup)?

An Uninterruptible Power Supply (aka a UPS Battery Backup) protects vital connected equipment -- computers, servers, and telecommunications equipment -- from power outages. During an outage, that small UPS Battery Backup under your desk at work gives you enough time to save your spreadsheet and properly shut down your computer.

Why do you need an uninterruptible power supply battery?

A properly sized and well-maintained uninterruptible power supply battery can grant your systems enough time to either ride out short outages or safely shut down equipment when a long-term outage occurs.

Do you need an uninterruptible power supply (UPS)?

A power failure is more than an inconvenience--it can knock out essential equipment for hours on end. If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

How much does a replacement battery cost for an uninterruptible power supply?

The replacement battery kit can cost around \$100, depending on the size and battery capacity of your Uninterruptible Power Supply. Some Uninterruptible Power Supplies share a data connection over a USB or serial cable so that they can speak to the computer via software to let it know when to shut down.
